FERTILIZER FOR ALL CROPS

LAWN GRASS SEEDS — Composed of a well-balanced formula of the very best seeds suitable for this section; will produce a perfect lawn of firm and elastic turf. Also special mixture for shady spots.

OTHER GRASS SEEDS — Timothy, Red Clover, White Clover, Alfalfa Clover, Alsike Clover, Blue Grass, Orchard Grass, Red Top Grass, Lawn Grass, Hungarian and Golden Millet, Permanent Grass Mixture, etc.

Full Line of Choice Flower Seed, Extra Fine Sweet Peas and Nasturtiums in Bulk.

TO SMALL GARDENERS AND BEGINNERS — Many times we hear the remark that there is no satisfaction in planting vegetable, lawn grass or other seeds, because they do not get good results. The trouble generally is they do not get seeds suitable to the locality. We have been supplying farmers all over Long Island, we know what seeds will give best results and are selling to gardeners the very same seeds we sell to farmers in bulk. Extra fine strains of Sweet Peas and Nasturtiums sold in bulk.

While we exercise the greatest care to have all seeds pure and reliable, we give no warranty, either expressed or implied, as to the description, quality, productiveness, or any other matter, of any seeds we send out and will not be in any way responsible for the crop. If the purchaser does not accept the seeds on these conditions they must be returned at once.—J. & T. Adikes.

CORN

Sugar corn is liable to rot and should not be planted until the ground has become warm; for a succession, plant every two weeks, until the middle of July, in hills 3 feet apart each way, covering about half an inch deep, and thin out to 3 plants to a hill. The extra early varieties can be planted 18 inches in the row and 2½ feet between the rows.

CELERY

Sow early in an open border, in shallow drills, and water freely in dry weather. Rolling or pressing the seed in the soil is more satisfactory than covering. When the plants are 5 to 6 inches high, transplant in rows 3 to 4 feet apart; plant 6 inches apart in the row. Cultivate well, and when large enough, blanch by earthing up. To make the plants stocky, cut the tops off once or twice.

PARSNIP

Sow as early in spring as weather will permit, in drills 18 inches apart, covering half an inch deep. When well up thin to 5 to 6 inches apart in the row.

	oz.	¼lb.	1 lb.
Hollow Crown15	.35	1.10
Guernsey15	.35	1.10
*Popular Varieties.			

PEAS

Sow as soon as danger of frost is over in drills 3 or 4 inches deep, using one quart to 100 feet of drill; rows 2½ to 3 feet apart. A good way is to sow in double drills 6 or 8 inches apart, one inch apart in the drill. Smooth varieties should be sown first; wrinkled varieties later after the ground has become warm as they are more liable to rot. Late varieties should be planted 5 to 6 inches deep.

SPINACH

Spinach is an important market gardener's crop of easy culture. For spring and summer use sow either broadcast or in drills 1 foot apart and 1 inch deep, as early as the ground can be worked, and every two weeks for a succession. For winter and early spring use, sow in September in well manured ground; cover with straw on the approach of severe cold weather.

FERTILIZERS

Your Flower and Vegetable Garden needs proper Fertilization to produce the best results. Our seedsmen will be pleased to advise the best kind for your individual use. J. & T. Adikes Fertilizers are especially chosen for local conditions and have given results to Farmers and Gardeners for years.

Nitrate of Soda
Ground Bone
Phosphate

Stimulant
Land Lime
Humus
Hardwood Ashes

Sheep Manure
Fertilizer
Potash-Marl

INSECTICIDES

There are Insecticides and Fungicides for all Plant Diseases and Insects. To insure Remedy and Cure the Gardener must apply the right one. We carry a complete line of Insecticides and Fungicides and will advise on their uses.

Paris Green
Arsenate of Lead
Bordeaux Mixture
Nicotine
Helebore
Melrosine

Slug Shot
Lime Sulphur
Krystal Gas
Carbola
Scalecide
Sulfocide

Pyrox
Black Leaf 40
Tobacco Dust
Lice Powder
Grape Dust
Fly-O-San

Inspect our Sprayers — Built of best materials and of best workmanship.

L A W N S

A fine lawn depends upon good seed and proper application of Fertilizers. Our Lawn Grass Seed has grown beautiful lawns for many years.

P L A N T S

An easy and sure way of growing fresh vegetables. Our plants have been grown from tested seed and have had the proper care, which insures best results. Celery, Cabbage, Tomato and other plants in season.

NOTICE!

Telephone and Mail Orders receive our most careful attention.
